	<p>In a few moments, I'll give you this piece of paper and a pencil. When you receive the clipboard you should write the initials of your name in the upper left corner of the paper. Please, write the initials of your name and last name. Is it clear what you have to do?</p> <p>Interviewer: if it is not clear, explain it better.</p> <p>For those who don't know how to write a note, the instruction to the respondent will be to make an "X" on the upper left corner of the paper.</p>	
q11	Interviewer: Is the participant able to perform the task?	(0) Yes (1) No, he/she is blind or has low vision (2) No, for another reason (8) Does not apply

	<p>In the following task, you will listen to a list of words that you should memorize, because in a moment I will ask you to repeat these words.</p> <p>First, I need to check whether the sound is clear enough so you can hear it. Please, listen to this message: <i>Please, let me know if you can clearly hear this message.</i></p>	
q12	<p><b>Interviewer: a test will be carried out to check the volume of the tablet's sound.</b></p> <p><b>Interviewer: Can the interviewee hear correctly?</b></p>	<p>(0) No, the list will be read by the interviewer (1) Yes, the list will be read by the computer (2) Older adult does not listen (8) Does not apply</p>
	<p>Now you'll listen to a list of 10 words. Once finished, I'll ask you to repeat the words you remember. The list is intentionally long to make it difficult for anyone to remember all the words. Most people only remember a few words. Please, pay close attention to the 10 words because I can't repeat them. When I'm finished, I'll ask you to repeat out loud all words you can remember, regardless of the order. Is it clear what we are going to do?</p> <p><b>Interviewer: if the participant didn't understand the task, explain it again.</b></p> <p>Shall we begin?</p> <p><b>Interviewer: Audio will play automatically after pressing OK.</b></p>

## PHYSICAL MEASUREMENTS

	<p><b>INSTRUCTIONS:</b></p> <ul style="list-style-type: none"> <li>The tests and anthropometric measurements will be performed only with residents aged 50 years or older.</li> <li>Before performing any test or taking anthropometric and blood pressure measurements explain the procedure to the interviewee.</li> <li>Demonstrate the procedure to the interviewee before each performance. After the demonstration, ask him/her if he/she feels comfortable performing the test. Don't perform the test if the interviewee reports insecurity or is unwilling to do it.</li> <li>Before starting physical measurements, please pass alcohol gel in your hands. If possible wash your hands before.</li> </ul> <p>Some measurements should be taken two or three times and the results should be recorded in the indicated field.</p>

<b>HANDGRIP STRENGTH</b>		
Now I will use an instrument called dynamometer to test the strength of your hand. This test can only be performed if you hadn't undergone any arm or hand surgery in the last three months.		
mf25	IN THE LAST THREE MONTHS, have you had any surgery performed on the arm or hand that you use most frequently (dominant hand)?	(0) No (1) Yes <b>(GO TO mf31)</b> (8) Does not apply
<p><b>Instruction</b></p> <p>I'll show you how to perform the test.</p> <p>Use the arm that you think it's stronger. Bend your elbow about 90° and keep the wrist in a neutral position. Don't let the arm touch the body or flex it while pressing the device. Take both metal pieces together like this (<a href="#">demonstrate it</a>). Do I need to adjust the device for your size?</p> <p>When I tell you "now", press very hard. As hard as you can. The two metal pieces won't move, but I'll be able to see the intensity of your strength. I'll perform this test three times. Let me know if you feel any pain or discomfort.</p> <p>You can test once using your non-dominant hand and then you must perform the test three times.</p> <p><b>Interviewer:</b> <a href="#">check if the device is adjusted to the interviewee's hand.</a></p>
